

3-19-20

As COVID-19 (novel coronavirus) continues to spread across the globe, and within the United States, I would like to let all our valued customers and partners know what Linearizer Technology, Linear Photonics and Linear Space Technology are doing to respond to this health emergency.

Our priorities are the safety and well-being of our employees, customers and partners, families, and the communities in which we live and work. We continue to assess the situation daily, and we have implemented industry best practices such as travel and visitor restrictions, work from home policies where possible, social distancing, etc. We are also remaining vigilant and adhering to all recommendations from the World Health Organization (WHO) and U.S. Centers for Disease Control and Prevention (CDC) and our local authorities.

Our facility and manufacturing operations continue to run as usual; we continue to support our full production schedules; we are working with our suppliers to maintain inventories and we will continue to provide the same outstanding levels of service that you have come to depend on from our companies. At this point, we are experiencing minimal disruption, however, should we experience delays, these will be communicated to customers as soon as they are known.

I would like to reaffirm our commitment through all of our companies (Linearizer Technology, Linear Photonics, and Linear Space Technology) to meeting your needs and we look forward to serving you as we navigate through this time of uncertainty.

I sincerely hope you and your families are well.

Best regards,

Allen Katz  
President  
Linearizer Technology and Affiliates
